ESSEX GROUP, INC. - 137 Delta Drive
PA-0658
O'HARA TOWNSHIP
ALLEGHENY COUNTY; PENNSYLVANIA

The subject site is a brick office/light industrial building located at 137 Delta Drive in the Allegheny County Industrial Park, on property owned by the Regional Industrial Development Corporation of Southwestern Pennsylvania ("RIDC"). Between 1969 and 1980 the site was reportedly occupied by Essex Group, Inc. (or a subsidiary of Essex Group). That company was engaged in the assembly of integrated printed circuit boards at the site, according to Mr. James Boggs (Environmental Coordinator, Essex Group, Inc.; Telecon: 313/593-9055). At some time between 1970 and 1975, the Essex Group was reportedly sold to United Technologies, Inc.

Prior to development of the area into an industrial park, the site and its vicinity were owned by Allegheny County and used as a "workhouse and inebriate asylum" (Allegheny County Recorder of Deeds).

Small quantities of organic solvent degreasing waste (possibly acetone or toluene) were generated by Essex Group at the site facility but were reportedly transported off-site by another party for disposal and/or treatment elsewhere.

A representative from the Pennsylvania Department of Environmental Resources (PA DER) visited the site on April 17 and 18, 1986. At that time there was no evidence of past waste disposal or mismanagement at the site (i.e. no visible waste, leachate, stressed vegetation, odors, discolored soil, etc.). Land use at the RIDC Industrial Park is restricted to offices, laboratories and light industry. Modern office and industrial buildings in the industrial park are surrounded primarily by paved parking lots and a considerable amount of landscaped lawns. There is no area in the RIDC Industrial Park that appears to have been a general waste disposal site.

(even when no problem was identified at a particular site). According to Mr. Boggs, notification forms were submitted for non-problem sites in an effort to reduce potential future Essex Group liabilities for non-compliance with CERCLA prerequisites.

Surface water runoff from the site vicinity flows into storm sewers in parking lots and streets around the site building, and then into an unnamed tributary of Squaw Run (see attached site sketch). Squaw Run flows into the Allegheny River at a point approximately 0.3 miles upstream of the two surface water intakes for the City of Pittsburgh Allegheny River water treatment plant. That facility supplies an average of 60 million gallons per day of public drinking water to approximately 450,000 persons within and around the City of Pittsburgh. Public water at the RIDC Industrial Park and in the Borough of Blawnox, which lies adjacent to and southeast of the industrial park, is provided by the City of Pittsburgh.

Until 1981, the Borough of Blawnox (population approximately 1650 persons) derived its public water from two wells (64 and 57.17 feet deep) along the Allegheny River (see attached topographic map). In 1981 the Allegheny County Health Department closed the Blawnox water supply after volatile organic compounds were observed in the water supply wells (dichloroethane: 110 ppb; 1,2-dichloroethene: 24 ppb; 1,1,1-trichloroethane: 1 ppb; trichloroethene: 220 ppb). Since that time Blawnox has purchased its water from the City of Pittsburgh. The contamination of the Blawnox wells is not believed to have originated at the subject site.
